<sup>1</sup> The information is provided in accordance with the Car Energy Labeling Ordinance. The specified values were determined according to the prescribed measurement procedure WLTP (Worldwide harmonised Light-duty vehicles Test Procedures).

The fuel consumption and CO<sub>2</sub> emissions of a car depend not only on the efficient use of fuel by the car, but also on driving style and other non-technical factors. CO<sub>2</sub> is the greenhouse gas primarily responsible for global warming.

A guide on the fuel consumption and CO<sub>2</sub> emissions of all new car models offered in Germany can be viewed free of charge at every sales location in Germany where new cars are exhibited or offered. The guide is also available here: <https://www.dat.de/co2/>

Only the CO<sub>2</sub> emissions caused by the operation of the car are stated. CO<sub>2</sub> emissions that arise or are avoided through the production and provision of the car as well as the fuel or energy sources are not taken into account when determining CO<sub>2</sub> emissions according to WLTP.

<sup>2</sup> For electric vehicles and hydrogen-powered fuel cell vehicles, a tax exemption is granted for ten years from the day of first registration upon first registration between May 18, 2011 and December 31, 2025, but no later than December 31, 2030.
